

Participant Details

Full Name	Hamish HPV do Not Use - PMS	Gender	Male
Date of Birth	06-05-1995	Sex assigned at birth	Female
Ethnicity	Māori, Samoan	Address	133 Molesworth Street, Thorndon, Wellington, 6011
NHI Number	ZMH3129		

Participant Summary

Pathway Status	1st Repeat HPV Recall	Immune Deficient	No information available
Next Expected Event	HPV Test Result	Total Hysterectomy	No information available
Next Event Due Date	12-08-2025	Cervical/Vaginal Cancer	No information available
Send programme correspondence	Yes		

Screening History

Specimen taken	12-08-2024
Event	Cytology Test
Specimen Type	LBC - Liquid based cytology
Specimen Id	ZMH312991024319
Site Code	R - Cervical
Specimen Taker	Coral Fonseca
Requested By Facility	Dr John E Upsdell's Surgery
Received by Facility	Amanda's Family Planning Clinic
Adequacy	S1 - The specimen is satisfactory for evaluation.
Interpretation	ASL - There are atypical squamous cells of undetermined significance (ASC-US) present, LS - There are abnormal squamous cells consistent with a low grade squamous intraepithelial lesion (LSIL; CIN1/HPV).
General Category	G2 - CYTOLOGY: EPITHELIAL CELL ABNORMALITY
Recommendation	H5 - Please repeat the HPV test in 12 months. A clinician-taken Liquid Based Cytology (LBC) sample is recommended as cytology may also be indicated.
Grade	LG - Low Grade
Specimen taken	12-07-2024
Event	HPV Test
Specimen Taker	Coral Fonseca
Requested By Facility	Dr John E Upsdell's Surgery
Received By Facility	Amanda's Family Planning Clinic
Specimen Id	ZMH312981024430
Test Type	ABAL - Abbott Alinity
Subtype Detected	HPV: NOT DETECTED
Recommendation	H7 - Please recall now for a clinician-taken liquid-based cytology (LBC) sample as cytology is indicated.

Specimen taken	27-06-2024
Event	HPV Test
Specimen Taker	Coral Fonseca
Requested By Facility	Dr John E Upsdell's Surgery
Received By Facility	Amanda's Family Planning Clinic
Specimen Id	ZMH312981024406
Test Type	ABAL - Abbott Alinity
Subtype Detected	HPV: NOT DETECTED
Recommendation	H2 - The next HPV screening test should be taken in 3 years because of the clinical history of immune deficiency.

Date	27-06-2024
Event	Medical Condition
Source	TR - Test Result
Type	IMSUP - Immunosuppressed

Specimen taken	27-06-2024
Event	Cytology Test
Specimen Type	LBC - Liquid based cytology
Specimen Id	ZMH312981024406
Site Code	R - Cervical
Specimen Taker	Coral Fonseca
Requested By Facility	Dr John E Upsdell's Surgery
Received by Facility	Amanda's Family Planning Clinic
Adequacy	S1 - The specimen is satisfactory for evaluation.
Interpretation	O2 - There are fungal organisms morphologically consistent with Candida species.
General Category	G1 - CYTOLOGY: NEGATIVE FOR INTRAEPITHELIAL LESION OR MALIGNANCY
Recommendation	H2 - The next HPV screening test should be taken in 3 years because of the clinical history of immune deficiency.
Grade	N - Negative
